RE: Letter of Recommendation

To whom it may concern;

As a contractor, pulling off a very large and successful project without any mishaps is not an easy feat. And then, add in MBE/DBE/WBE goals on top of it, and you end up with a whole other list of concerns.

However, with the help of Garza Roofing Equipment & Supply, it was seamless.

On our most recent project with METRA, Garza was our material supplier. Jennica showed up on site to receive in the material, and inventory everything.

Not to mention the turn-around time on all necessary documents was same day.

Communication was excellent throughout the whole process.

We will definitely be doing business with them again.
